## Class 10

### Foreword

The National Education Policy (2020), Government of India, envisions transforming school education by equipping students with 21st century skills. The endeavour is to shift focus from rote-learning to acquisition of competencies with a resolve to make education more meaningful and relevant.

The Central Board of Secondary Education (CBSE) in its continuous endeavour to improve the quality of education has already introduced some initiatives in this direction. Strengthening these efforts, the Board had signed an MoU with Sri Aurobindo Society (SAS), Pondicherry in November 2019. As a part of this initiative, SAS is supporting CBSE to develop resource materials, train teachers and take other measures that would facilitate adoption of Competency Based Education in schools. SAS has engaged with Australian Council for Educational Research (ACER) as its knowledge partner for this project.

CBSE, in collaboration with SAS and ACER, has prepared this resource material- ***Curriculum Aligned Competency Based Test Items (Class 10)*** in February, 2022 which is a compilation of assessment items in Mathematics that are aligned to the NCERT/CBSE curriculum. These tasks based on authentic real life situations focus on developing critical understanding among learners in the discipline. Each test covers about 10 questions from a chapter. The assessments, useful for students' practice, are also exemplars for teachers who with their ingenuity can develop many similar items.

— Team CBSE

## About CBSE

The Central Board of Secondary Education (CBSE) is a national Board under the Ministry of Education, Government of India. The Board has more than 27,000 schools affiliated to it in India and overseas, in 25 countries. These include the Kendriya Vidyalayas, the Jawahar Navodaya Vidyalayas, schools run by Central Government organizations such as The Army, Navy, Air Force etc., schools run or aided by the State Governments and independent private schools. The Board's mission is to encourage quality of education focussed on holistic development of learners. It motivates schools and teachers to adopt learner centric enquiry-based pedagogies and use innovative methods to achieve academic excellence. The Board is committed to providing a stress-free learning environment to develop competent and confident students who emerge as enterprising citizens of tomorrow, promoting harmony and peace in the world.

## About SAS

Sri Aurobindo Society (SAS) is an international, spiritual, and cultural, not-for-profit NGO. SAS has been recognised by the Government of India as a Charitable Organisation, a research institute and an institute of national importance. Sri Aurobindo Society has more than 300 centres and branches across the country, with its head office in Puducherry. SAS is setting up models, centers of excellence and training institutions that are sustainable, scalable and replicable in the country.

## About ACER

Australian Council for Educational Research (ACER) is a leading and pioneer international organization working in the field of competency based learning. ACER has been instrumental in coordinating a consortium of international organizations for the implementation of the Programme for International Students Assessment survey in 2000, 2003, 2006, 2009 and 2012.

### Real Numbers

Aadya has 143 stamps; she gives away 11 stamps and divides the remaining equally into groups. Sumit has 220 stamps; he gives away 11 stamps and divides the remaining equally into groups. They end up with the same number of groups.

SAS21M10Q0101

- 1 What is the number of groups?

---

---

SAS21M10Q0102

- 2 What is the number of stamps in Adya's and Sumit's groups?

---

---

SAS21M10Q0103

- 3 A number is multiplied by 5. Then, 40 is subtracted from the product. The result obtained is then multiplied by 2 and 50 subtracted from the product so obtained. The answer is a two-digit number. What is the largest integer that can be used to get a two-digit number as the answer?

Richa is an artificial jewellery seller. She buys them from a dealer at a price based on the presence or absence of stones as shown in the table below.

Item	With stones	Without stones
Ring	110	70
Earring pair	170	90
Bangle pair	90	120

SAS21M10Q0104

- 4 For every ring with stones, two rings without stones are purchased by Richa's customers. Richa buys rings accordingly from the dealer for Rs 10 000. How many rings does she buy?

---

---

SAS21M10Q0105

- 5 In her next visit to the dealer, Richa finds that dealer has increased the price of rings with stones by Rs 10. Richa still wants to spend Rs 10 000 on rings. What is the reduction in the number of rings she buys?

- A. 10  
B. 20  
C. 40  
D. 50

SAS21M10Q0106

- 6 The dealer increases the price of one type of earrings. Richa buys earrings (with stones and without stones) in the ratio of 5:9 before the price hike. After the price hike, she buys earrings in the ratio of 8:13 with the same amount of money. Does she buy more earrings with stones than earrings without stones after the price hike? Give reasons.

---

---

SAS21M10Q0107

- 7 Richa purchases 37 pairs of bangles with stones and 33 pairs of bangles without stones. She divides them into two sets. Set 1 contains 40 pairs of bangles, and set 2 contains 30 pairs of bangles. What is the difference between the number of bangle pairs with stones in set 1 and the number of bangle pairs without stones in set 2?

- A. 4  
B. 7  
C. 10  
D. 30

SAS21M10Q0108

- 8 Despite the price hike by the dealer, Richa increases the number of jewellery with stones she purchases for her customers. What could be the reason for her decision?

Kartik is a salesman of mobile phones. His yearly target is to sell a fixed number of mobile phones in a year. He planned to meet  $\frac{6}{11}$  of his yearly target by selling the phones during a festive month. He could only meet  $\frac{6}{11}$  of his target for the festive month. He now has to meet the remaining target for the month and sell 425 more mobile phones to meet his yearly target.

SAS21M10Q0109

- 9 Approximately what percentage of the yearly target was met during the festive month?

---

---

SAS21M10Q0110

- 10 How many units of the mobile phones did Kartik have to sell to meet his yearly target?

### Polynomials

Amit designs a flower vase using a graph of polynomial equations. Equation of the curve  $l$  is given in the graph.

SAS21M10C0201

- 1 Sara looks at the graphical model and makes an observation, “The zero of the polynomial is at the origin.” Is she correct? If not, what are the coordinates of the zero of the polynomial

---

---

SAS21M10C0202

- 2 The curve  $m$  is a mirror image of  $p(y)$  on the  $y$  axis. Which polynomial represents curve  $m$ ?

- A.  $p(y) = -0.25y^3 - 0.1y^2 + 0.3y - 1$
- B.  $p(y) = -0.25y^3 - 0.1y^2 - 0.3y - 1$
- C.  $p(y) = 0.25y^3 + 0.1y^2 - 0.3y + 1$
- D.  $p(y) = 0.25y^3 + 0.1y^2 - 0.3y$

SAS21M10C0203

- 3 Sara changes the coefficient of  $y^3$  in the polynomials for the curves  $l$  and  $m$ . How does it affect the shape of the flowerpot?

---

---

SAS21M10C0204

- 4 Amit wants to decrease the minimum opening of the flower pot. Which term of the polynomials for the curves  $l$  and  $m$  should he change?

Ajit uses a cardboard sheet of 30 cm  $\times$  40 cm to design a box. He marks four squares of equal size with side length  $x$  cm to draw the net of the open box.

SAS21M10C0205

- 5 Ajit folds the net to make an open box. What will be the volume of the open box?

---

---

SAS21M10C0206

- 6 Ajit decides that the height of the box should be lesser than its length and width. What are the possible range of values for  $x$ ?

---

---

A graph of a cubic polynomial is plotted on a graph paper.

SAS21M10C0207

- 7 What is the sum of the roots of the polynomial?

---

---

SAS21M10C0208

- 8 The graph of a polynomial shows it is extended on both sides. What does it indicate about the values of the y coordinate?

---

---

SAS21M10C0209

- 9 A quadratic polynomial has integral roots. The sum of its roots is 7. Which of the following cannot be the constant term of the polynomial?

- A. 6
- B. 10
- C. 12
- D. 14

SAS21M10C0210

- 10 A polynomial is given by  $p(x) = x^3 - 2x^2 + \frac{3}{4}x$   
For what values of  $x$  is the polynomial  $p(x) = 0$ ?

Tickets for a play can be booked online as well as purchased from the theatre. A 10% discount is available on online ticket purchase. Simran likes to watch plays. She purchased the ticket online for a play. The ticket and food cost her Rs 600. The cost of food was one-third the cost of the ticket.

SAS21M10C0301

- 1 Represent the relation between the cost of the ticket and the cost of food for Simran algebraically. Also represent the relation between the cost of the ticket and the cost of food for Simran and money spent algebraically.

---

---

SAS21M10C0302

- 2 Simran purchased the ticket for a musical play from the theatre. How much can she spend on food in Rs 600?

---

---

SAS21M10C0303

- 3 A group of friends went to watch a play. Some of them purchased tickets online and some bought them at the theatre. If two more had purchased online tickets the total ticket price would be Rs 100 less. Is this true for any group greater than 2? Why?

---

---

SAS21M10C0304

- 4 In the theatre canteen, two packets of popcorn and a mango drink cost Rs 330. One packet of popcorn and two mango drinks cost Rs 300. What is the cost of the packet of popcorn?

- A. 100
- B. 120
- C. 150
- D. 200

Large cargo ships ferry cargo between ports. They take months to ferry them from one port to another. The distance in the sea is calculated in nautical miles (nm). The map shows the eastbound (grey) and westbound (black) cargo lines of a shipment company.

The distance between port 6 and port 7 is approximately 20 000 nm and a ship takes 95 days to travel between the ports in either direction.  
The distance-time graph drawn by Pooja shows the journey of eastbound and westbound ships.

SAS21M10C0305

- 5 What do the two axes in the graph show?

SAS21M10C0306

- 6 According to Pooja's graph, what is the approximate distance travelled by the eastbound ship during these 95 days?

---

---

SAS21M10C0307

- 7 Anish looks at the graph and claims that an eastbound ship route meets the westbound route at 13000 nm. Is he correct? Give reasons.

---

---

SAS21M10C0308

- 8 The eastbound and westbound journeys are of different length in 95 days. What can be the possible reason for it?

### Quadratic Equations

Digital images consist of pixels. A pixel can be considered as the smallest unit on a display screen in a mobile or a computer. The number of pixels, their size and colours depend on the display screen and its graphic card. Display screens are rectangular in shape and their size is defined as the length of the diagonal.

Amit is designing a web page for a display on a screen whose size is 1000 pixels.  
The width of the screen is 800 pixels.

SAS21M10C0401

**1** Which of the following equation can be used to calculate the height ( $h$ ) of the screen?

- A.  $h^2 + 200 \times 1800 = 0$
- B.  $h^2 - 200 \times 1800 = 0$
- C.  $h^2 - 200 = 0$
- D.  $h^2 - 1800 = 0$

SAS21M10C0402

- 2 The size of a screen display can be measured in inches also.  
Is it possible to have a screen of size 13 inches where the width is 7 inches more than height? Give an example to justify.

SAS21M10C0403

- 3 The size of a screen is an important factor in designing a web page. The page can be opened on different screen sizes but during the initial designing stage, one screen area is considered as the safe area. The content in the safe area can be viewed without horizontal and vertical scrolling of the web page. The safe area of a web page is 40 pixels less than the width and 190 pixels less than the height of the display screen.  
Which of the following expression represents the safe area for the screen whose screen height is 200 pixels less than the screen width ( $w$ )?

- A.  $w^2 - 50w + 400$
- B.  $w^2 - 350w + 30400$
- C.  $w^2 - 430w + 15600$
- D.  $w^2 - 200w + 7600$

SAS21M10C0404

- 4 Which of the following is not a method of solving a quadratic equation?

- A. Factorisation
- B. Completing the square
- C. Using quadratic formula
- D. Identifying the nature of the root

Given below is the conversation between Gayatri and a mason.

Gayatri: 'Here are some  $90\text{ cm} \times 90\text{ cm}$  tiles. I want to use these in flooring of our courtyard.'

Mason: 'If I use all of these tiles, there will be four more columns than rows.'

Gayatri: 'I want to make a square floor.'

Mason: 'Either some tiles will be left unused or 35 additional tiles are required.'

Gayatri: 'I do not think 35 additional tiles are required to make a square courtyard.'

Mason: 'Okay, that is possible, but you still have to buy some more.'

SAS21M10C0405

- 5 How many tiles did Gayatri have?

SAS21M10C0406

- 6 What is the minimum number of tiles she has to purchase to make a square courtyard?

---

---

SAS21M10C0407

- 7 For the minimum number of tiles purchased, what can be the side length (in m) of the square courtyard?

---

Under a relief scheme, Rs.  $n^2$  was distributed among 'n' number of people. The first beneficiary received Re. 1 plus  $\frac{1}{n+1}$  of the remaining amount. The second beneficiary received Rs. 2 plus  $1\frac{1}{n+1}$  of the remaining amount. The third beneficiary received Rs. 3 plus  $1\frac{1}{n+1}$  of the remaining amount. The distribution is done in the same pattern for all the beneficiaries.

SAS21M10C0408

- 8 Which of the following expression represents money received by the first beneficiary?

- A.  $1 + \frac{1}{n} (n^2 - 1)$
- B.  $1 + \frac{1}{n} \times n^2$
- C.  $1 + \frac{1}{(n+1)} \times n$
- D.  $1 + \frac{1}{(n+1)} (n^2 - 1)$

SAS21M10C0409

- 9 Who do you think will get the maximum amount?

Stadium seating surrounds the centre pitch. Each row in the seating is positioned at a slightly higher level than the one in front of it. A safe seating-standing section of a stadium is shown in the figure below.

There are 20 rows in the section. Each row in the section is 700 mm in height, excluding the seat and has one more seat than the previous row, starting from the second row. The first row has 4 seats.

SAS21M10C0501

- 1 Sidharth is seating in the centre seat of Row 12 in the section.  
How many seats are on his left?

- A. 5
- B. 7
- C. 8
- D. 24

SAS21M10C0502

- 2 What is the seating capacity of the section?

- A. 80
- B. 210
- C. 270
- D. 840

Sam is standing in Row 15 and Ronit is standing in Row 1.

SAS21M10C0503

- 3 How much higher is Sam's row than Ronit's?

---

---

SAS21M10C0504

- 4 The height of the section is measured from the foot of the first row to the last row.  
What is the height of the section?

A chair is available in two models – with arms and without arms. A person bought 20 chairs of each model. After use, he stacked the chairs in a storeroom. The height of the storeroom is 1.55 m. The dimensions of the chair and how they are stacked is shown in the figure below.

The dimensions of the seat (in cm) is  $50 \times 40 \times 5$ .

SAS21M10C0505

5 What is the height of the stack shown in the figure?

- A. 30 cm
- B. 76 cm
- C. 100 cm
- D. 110 cm

SAS21M10C0506

6 What is the maximum number of chairs with arms that can be stacked in the storeroom?

- A. 4
- B. 8
- C. 9
- D. 10

SAS21M10C0507

7 What is the maximum number of chairs without arms that can be stacked in the storeroom?

SAS21M10C0508

8 What is the minimum number of columns (stacks) in which all chairs can be stacked in the storeroom?

---

---

SAS21M10C0509

9 What can be the dimension of the storeroom (in m)?

- A  $0.3 \times 1.5 \times 1.55$
- B  $0.4 \times 1.75 \times 1.55$
- C  $0.5 \times 0.4 \times 1.55$
- D  $1 \times 2.75 \times 1.55$

SAS21M10C0510

10 What cannot be the difference between four consecutive terms of an arithmetic progression?

- A. 0, 0, 0

Some concrete water towers have been built to supply water to the localities nearby. They are usually mounted with a cylindrical tank. A water tower for a locality is 40 m high.

SAS21M10S0601

- 1 The water tower cast a shadow of 25 m. At the same time, a tree near it casts a shadow of 5 m. What is the height of the tree?
- A. 3.12 m
  - B. 8 m
  - C. 20 m
  - D. 25 m

SAS21M10S0602

- 2 A scale model of the water tower of 100 cm height is created. The height of its pillars is 75 cm each. What is the height of a pillar (in m) in the actual water tower?
- A. 7.5
  - B. 25
  - C. 30
  - D. 53.4

SAS21M10S0603

- 3 Dharmendra made a scale model of a water tower for another locality. The radius of the reservoir in the model is 6 cm and its volume is  $216 \text{ cm}^3$ . The radius of the actual water reservoir is 2.5 m. What is its volume?

SAS21M10S0607

7 Which criteria of similar triangles do not apply to triangles AGF and ADE?

- A. AAA
- B. SSS
- C. SAS
- D. RHS

SAS21M10S0608

8 The area of triangle ABC is  $692 \text{ cm}^2$ . What is the area of the plank AGF?

### Some applications of Trigonometry

At a toll plaza, an electronic toll collection system has been installed. FASTag can be used to pay the fare. The tag can be pasted on the windscreen of a car.

At the toll plaza a tag scanner is placed at a height of 6 m from the ground. The scanner reads the information on the tag of the vehicle and debits the desired toll amount from a linked bank account.

For the tag scanner to function properly the speed of a car needs to be less than 30 km per hour. A car with a tag installed at a height of 1.5 m from the ground enters the scanner zone.

SAS21M10N0901

- 1 The scanner gets activated when the car's tag is at a distance of 5 m from it. Give one trigonometric ratio for the angle between the horizontal and the line between the car tag and the scanner?

SAS21M10N0902

- 2 The scanner reads the complete information on the car's tag while the angle between chip and scanner changes from  $30^\circ$  to  $60^\circ$  due to car movement. What is the distance moved by the car?

- A.  $\sqrt{3}$  m
- B.  $3\sqrt{3}$  m
- C. 4.5 m
- D.  $4.5\sqrt{3}$  m

SAS21M10N0903

- 3 A vehicle with a tag pasted at a height of 2 m from the ground stops in the scanner zone. The scanner reads the data at an angle of  $45^\circ$ . What is the distance between the tag and the scanner?

- A. 2 m
- B. 4 m
- C.  $4\sqrt{2}$  m
- D. 8 m

At the toll plaza, a traffic monitoring camera is also installed at a height of 6.2 m. It takes pictures of moving vehicles at regular intervals.

The diagram below shows the position of the camera and a car moving away from it after paying the toll in four instances. The speed of the car is 5 m/s.

SAS21M10N0904

- 4 The angle made by the camera to the car in instance 1 is  $30^\circ$  and changes to  $60^\circ$  in instance 4. What is the distance moved by the car? ( $\sqrt{3} = 1.73$ )

SAS21M10N0905

- 5 Seaweed is found under an 80 m deep seafloor. To reach it a diver makes a  $45^\circ$  dive from a boat. What is the distance travelled by the diver to reach the seafloor?

A. 80 m  
B. 80.2 m  
C.  $80\sqrt{2}$  m  
D.  $80\sqrt{3}$  m

SAS21M10N0906

- 6 By the time the diver collected seaweed, the boat shifted 20 m on the opposite side. The diver now has to rise at an angle of  $60^\circ$  to reach the boat. What is the distance the diver travels to reach the boat?

- 1 Jeenal wants to divide a line segment internally in the ratio  $p:q$ . What is the least number of equal parts of the line segment Jeenal needs to make to divide the line in the required ratio?

- A.  $p$
- B.  $q$
- C.  $p - q$
- D.  $p + q$

Here is Jeenal's process to divide a line segment PQ externally in the ratio 4:5.

Step 1: Draw the line segment PQ of the given length.

Step 2: Draw any ray PY.

Step 3: On the ray PY, mark nine arcs of equal length (label the points of intersection A<sub>1</sub>, A<sub>2</sub>, A<sub>3</sub>, A<sub>4</sub> and so on up to A<sub>9</sub>).

Step 4: Join the point A<sub>4</sub> to the end point Q of the line segment.

SAS21M10S1102

- 2 What must be Jeenal's next step?

- A. Draw a line parallel to A<sub>4</sub>Q from A<sub>1</sub>
- B. Draw a line parallel to A<sub>4</sub>Q from A<sub>5</sub>
- C. Draw a line parallel to A<sub>4</sub>Q from A<sub>8</sub>
- D. Draw a line parallel to A<sub>4</sub>Q from A<sub>9</sub>

SAS21M10S1103

Sarah wants to cut a straw in the ratio 2:3.

She places the straw on her notebook and marks different points on it as shown in the picture.

SAS21M10S1104

4 Along which point should she cut the straw to get the desired ratio?

- A. Q
- B. R
- C. S
- D. T

Pawan wants to draw a triangle  $AB'C'$  similar to triangle  $ABC$  where length of  $AB' = \frac{3}{4} AB$ .  
She does the following

Step 1 – Draw triangle  $ABC$ .

Step 2 – Find the point that divides  $AC$  internally in the ratio 3:1.

Step 3 – Find the point that divides  $BC$  internally in the ratio 3:1.

Step 4 – Join the two points so found.

SAS21M10S1105

5 In which step did Pawan make a mistake?

SAS21M10S1106

- 6 Meera constructs a triangle ABC right angled at B whose base and perpendicular are of lengths 6 cm. Then, she constructed a similar triangle A'BC' whose sides are  $\frac{2}{3}$  times the corresponding sides of the given triangle. Which of the following shows the measure of all three angles of triangle A'BC'?

- A.  $\angle BA'C = 22.5^\circ$ ,  $\angle A'BC' = 135^\circ$  and  $\angle A'C'B = 22.5^\circ$
- B.  $\angle BA'C' = 45^\circ$ ,  $\angle A'BC' = 90^\circ$  and  $\angle A'C'B = 45^\circ$
- C.  $\angle BA'C = 60^\circ$ ,  $\angle A'BC' = 60^\circ$  and  $\angle C'B = 60^\circ$
- D.  $\angle BA'C = 67.5^\circ$ ,  $\angle A'BC' = 45^\circ$  and  $\angle A'C'B = 67.5^\circ$

Priyanka finds this piece of a circular disc in her grandma's trunk.

She wants to find the diameter of the disc.

SAS21M10S1107

- 7 What could Priyanka do to find the diameter of the disk?
- A. Find the centre of the inner circle by drawing the diameter and finding its mid-point.
  - B. Find the greatest distance between any two points on the boundary of the broken disc found.
  - C. Find the point P where rotation of the disc about the point P by  $360^\circ$  gets the disc in the same position.
  - D. Draw the perpendicular bisectors of two non-parallel chords to get the centre point and calculate the diameter.

Abhilasha wants to find the radius of a circle. She places a setsquare on the circle as shown below.

SAS21M10S1108

- 8 Based on the position of the setsquare and the readings shown on the setsquare, what is the diameter of the circle?

- A. 3
- B. 4
- C. 5
- D. 7

Here is a circle with centre O.

SAS21M10S1109

- 9 She says, "The radius of the circle is 3 cm."  
Explain with reasons why Shrishti is correct.

---

Pooja does the construction of tangents to a circle from a point outside it as shown below.  
Step 1 – Given a circle and a point outside it.

Step 2 – Draw a line from the centre of the circle  $O$  to the given point  $P$ .

Step 3 – Construct a perpendicular bisector of  $OP$ .

Label intersection of  $OP$  and the perpendicular bisector as  $M$ .

Step 4 – With  $M$  as centre and  $OM$  as radius, mark an arc across the circle at two points  $J$  and  $K$ .

Step 5 - Find the tangents from the point  $P$  to the circle by joining  $JP$  and  $KP$ .

Rajat claims that, in step 2, the perpendicular bisector can still be found using an alternate way. Draw intersecting arcs on one side of  $OP$  using the same radius and on the other side of  $OP$  with another radius as shown below and join the points of intersection.

Nishant and Kapil are playing a game of darts.  
They use this dart board.

Here are the rules of the game:

When your dart is placed in any circular region, you get the points mentioned in that region.

If your dart strikes outside the circles you get zero points.

During the game all the darts of both Nishant and Kapil fall in the circular region.

The radius of the innermost circle is 7 cm and the width of all other circular regions is 7 cm.

SAS21M10D1501

- 4 Kapil gets 25 points each, in the first and second throws.  
How many possibilities are there for the total points Kapil can have after four throws?

- A. 2
- B. 4
- C. 10
- D. 16

This is a paper cup.

Jaya tossed this cup.

When the cup lands on the table, it can land in three possible positions, as shown below.

To calculate the probability of falling in each position, Jaya tosses the cup 60 times. She records her observations in the table below.

Position of cup after toss	Frequency
Inverted	20
upright	5
Rolling side	35

SAS21M10D1505

- 5 Jays tosses the cup one more time.  
What would be the probability of the cup falling in the upright position?

- A.  $\frac{1}{3}$   
B.  $\frac{1}{11}$   
C.  $\frac{1}{12}$   
D.  $\frac{1}{60}$

Vani does an experiment to see if Jaya is correct in declaring the probability of the cup falling in the upright position.

She tosses a cup many times and plots a graph of her observations as shown below.

SAS21M10D1506

- 6 Based on the graph and Vani's observations what should be the probability of the cup falling in the upright position if Jaya were to toss the cup again?

In a classroom, a rectangular board is fitted on a wall. The length of the board is 2m and the width of the board is 1m.

Anuj draws this triangle on the board.

SAS21M10D1507

- 7 Anuj throws a bunch of chalks randomly at the board with all the chalks striking the board. What proportion of the chalks are expected to fall in the triangular region?

---

---

SAS21M10D1508

- 8 What is the probability of a chunk of chalk not hitting the board?

- A. 0
- B.  $\frac{1}{2}$
- C.  $\frac{1}{3}$
- D. 1

Ross observed the food a few puppies preferred to eat.

The table given below shows the number of puppies and their preferred food during day time.

Food	Number of puppies
Egg	10
Meat	20
Milk	7
Pet food	13

SAS21M10D1509

- 9** A puppy was chosen at random from the group that Ross observed.  
What is the probability that the chosen puppy prefers to have pet food during the day?

---

---

SAS21M10D1510

- 10** Sixty percent of the time, puppies prefers to have the same food at night, which they had eaten during the day.  
A puppy ate eggs during the day.  
What is the probability that the puppy will not eat eggs at night as well?

## Why Artham Resource Material?

Resource materials for teachers and students are essential tools for effective teaching and learning. They provide valuable information, guidance, and support to both teachers and students, making the teaching and learning process more efficient and productive.

For teachers, Artham resource materials include lesson plans, instructional guides, assessment tools, professional development materials, and teaching aids. These materials are well researched and created according to 2023-24 NEP and NCERT guidelines.

For students, resource materials can include textbooks, study guides, homework assignments, reference books, online learning platforms, and educational videos. These materials can be obtained from school libraries, educational publishers, online resources, and teachers.

Both teachers and students can also benefit from Artham educational resources which are free and openly licensed educational materials that can be used and shared for teaching and learning. Artham resource material include textbooks, courses, lesson plans, and multimedia resources that are available online.

In summary, resource materials are critical components of effective teaching and learning. They provide a wealth of information and support that can enhance the quality of education and help students achieve academic success.

Teachers and students can also purchase these resources from the links provided with every resource.
