

BBPSRH/PARENT/2023-24/50

12.08.2023

Dear Parents

Kite flying is a popular sport amongst young children that catches pace weeks before, during and after Independence Day celebrations every year.

However, the kite flying threads which are made out of plastic/ synthetic non-biodegradable material turn out to be fatal to the environment. It is therefore advised that the kite flying activity is conducted in its true spirit using only cotton threads free from any sharp/metallic/glass thread strengthening material.

Let's celebrate the festival with zeal, enthusiasm and utmost care for the environment.

Happy Independence to all!

Regards

Team BBPSRH
