THE STORY OF ORIGIN

Arithmetic Progression was invented by Johann Carl Friedrich Gauss

One day at school, Gauss's teacher wanted to take a rest and asked the students to sum the integers from 1 to 100 as busy work. To the teacher's annoyance, little Gauss came up to the teacher with the answer, right away. His classmates and teacher were astonished, and Gauss ended up being the only pupil to calculate the correct answer.

Here is how he calculated :

$$a + ar + \dots + ar^{n-2} + ar^{n-1}$$
$$\text{Sum} = \frac{a(1 - r^n)}{1 - r}$$

Stationnaire Shoppie is a stationery shop inside our school for students and teachers. It is an easy solution for students to buy stationery. In our daily life I generally see that in every 10 students, there are 2-3 students who forget to bring their stationery items at home. Eventually they have to borrow from other students of the class. We have come up with an easy solution to open a "Stationary Shop" in the school campus itself. This will also enable the students to order stationery through our online store.
