HYBRID LEARNING:
DIGITISATION OF TRADITIONAL CLASSROOM LEARNING EXPERIENCES (CLASS XI)

Dear Parent

Hybrid learning combines the best of in-school and remote learning, with digital engagement. Recent development in the Indian education system has seen a paradigm shift towards competency-based education and assessment. Students of Senior Department are focussing on developing competencies to excel in competitive exams like **CUET, CLAT, JEE and NEET**. As the pressures mount, students and educators look for ways and means to manage time efficiently. Technology provides innovative solutions to help students learn anytime, anywhere through recorded lectures, PowerPoint presentations, audiobooks, and learning apps. Access to various online digital courses and resources such as EMBIBE (PCBM) will help the students create digital portfolios and personalize their learning journey. The academic credits earned can be credited into Academic Bank of Credits as per the recent **National Credit Framework under NEP 2020 which recognizes the pervasiveness and benefits of online learning.**

The school has taken due cognizance of repeated requests from parents and students who sometimes find it challenging to balance self-study, competitive exam preparation & CBSE Board exams and has decided to introduce hybrid classes for class XI in session 2024-25. Thus, Students can allocate more hours to **self-study**, enhancing their understanding and mastery of subjects. Additionally, they will save time and energy otherwise spent on commuting and transportation, allowing for a more focused and efficient study schedule.

Hybrid Classes for Class 11 will be conducted every Wednesday/Friday for four hours, starting from **July 15, 2024 on Google Classroom.** On these days, students will follow a modified timetable from 8:00 a.m. to 12:00 Noon with 4 block periods for online sessions. Please note, the attendance for all block periods will be marked. Attendance for the day will be given if the student attends all periods. As per CBSE norms, 75% attendance will be mandatory in both online and offline classes combined.

We appreciate your support and cooperation in making this transition smooth and successful. Please ensure that required technical support & conducive environment is available at home for the same.

Warm regards,

Geeta Gangwani
 Principal
