

Glimpses of activities conducted in the month of October 2024

1. Students of astronomy club attended a workshop on, 'Jantar Mantar an ancient observatory' on 21 October 2024. In this session students learnt about various yantras used at Jantar Mantar for finding the local time. Students also created their own model of Jantar Mantar.
2. Club members attended a workshop on 'Finding Cardinal directions ' on 28 October 2024. The resource person Mr. Ashish Pachouri explained the difference between reference and cardinal directions, and made the students analyze the importance of different methods to locate cardinal directions. Students learnt the use gnomon to find local time and IST. The students were taken to the ground where they found the shortest shadow using gnomon.
