

ENVIRONMENTAL POLICY

Environment refers to everything that surrounds and affects us .It is therefore important to take care not only of the living and non-living organisms but also to understand and maintain a healthy interaction between them, in order to have an environment that favours the human survival. Human beings become by far the most important stakeholders on the environmental issues since they are capable of altering their surroundings considerably.

The need of the hour therefore is to protect our environment with unshakable conviction. Bal Bharati Public School, therefore, has always had a cautious approach towards environmental conservation.

Environmental Policy of the school
