Dear parents

Storytelling is the most powerful way to put ideas into the today world.

- Robert McKee

Stories create magic and provides children with a window to new worlds. Stories teach us about life, about ourselves and about others. Storytelling is a unique way for kids to develop an understanding, respect and appreciation for other cultures, and can promote a positive attitude towards people from diverse backgrounds.

Stories play a vital role in the growth and development of children. The students can relate to the books that they read. It's also good for children to understand that books are a useful source of information and also that good reading skills are important for success in their future lives.

STORY:- Chiku learns to wash her hands

- ✚ Reading and storytelling with your child promotes brain development and imagination, teaches your child about language and emotions, and strengthens your relationship. You don't always need to read books. Try looking at picture books, singing rhymes and songs, or telling stories from your culture. Reading stories with children has benefits for grown-ups too. It gives them an opportunity to learn new ideas and information, learning valuable life lessons through an engaging, exciting story. The special time you spend reading together promotes bonding and helps to build your relationship.

Do not ask your child to learn the story but only learn and imbibe the message it gives.

- ✚ Children are aware about coronavirus (COVID-19) these days. We must tell them the importance of keeping hands clean to prevent the virus from spreading. Let's make washing hands a practice to stay safe and healthy.

- ✚ Tell your child to follow the steps given below while washing hands.
