Dear Parents,

Hope you and your families are safe!

We are going through unprecedented times when students are not able to attend school due to spread of COVID-19 in the country. In this lockdown period, BBPS RH has been trying to provide opportunities to students for constructive engagement. We believe programming is a power that can not only change oneself but also has the potential to change the surroundings and the world, regardless of age, gender, race or position. The school has continued classes for Artificial Intelligence (AI) even during the lockdown period and continuing with our efforts, *we would like to share with you, another interesting and unique opportunity for your ward by introducing the "Progate Online Bootcamp", a platform from Japan.*

Progate is an easy-to-use platform designed to help students learn coding online. Progate Online Bootcamp will help students take their first steps towards *Web Development* through a thoughtfully designed, fun filled and engaging program. Students will be able to build their first web pages and subsequently their website.

The course is available free of cost, under lockdown. We strongly recommend that students should avail this opportunity. Students to kindly register through their G-Suite ids only.
