

# Bal Bharati PUBLIC SCHOOL ROHINI

## Principal's Message (2020-21)

**"The goal of education is not to increase the amount of knowledge but to create the possibilities for a child to invent and discover, to create men who are capable of doing new things."**

**- Jean Piaget**

The pivotal point in the ideology of school education is to prepare lifelong learners who can unlearn and relearn. If we evolve our learning strategies around this premise, then we can succeed in creating adults who are positive, proactive and productive. Therefore, the task of school is to help the child recognize his inner potential and hone it further.

BBPS Rohini is a premier Institution run under the aegis of Child Education Society (CES) celebrating 75 glorious years of its genesis. We strive to impart holistic education aiming not just academic excellence, sporting acumen but also core strengthening of values and skills. Apart from achieving distinction in teaching practices and providing world-class infrastructure, we endeavour to instill strong moral values and integrity of character in our children.

In the present times when our children are exposed to crisis situation by the outbreak of COVID 19, not just in the country but in the entire globe, we must strive to provide stability to our children. As UNESCO says, *'Education can help children deal better with the ordeals they are faced with in times of hardship. It has been noted that schools can provide children with the stability, structure and routine they need in order to cope with loss, fear and stress during and after crises.'* We are committed to fulfill our responsibilities as the prestigious and proactive Institution of our community and the country. We have engaged with various platforms and portals for online teaching, communication and administration. From sharing the list of websites and programmes for online joyful learning to conducting a live class on Google Classroom, we are deploying all online resources available to us.

Using this platform of communication, I would like to urge parents to join hands with the school and help foster strong partnership. You are requested to keep yourself updated by visiting school's website regularly and the official school Facebook page. We look forward to receiving your feedback because we believe children are central to all our enterprises. Together, we will ensure that our school is a learning haven where the future of our children is painted with hope and immense possibilities.
